

GENERAC®

Portable Generators

PRODUCT CATALOG

Better power. Better value. More choices.

Since the original portable that started it all in 1959, Generac has been engineering advances in standby power for over fifty years. Generac's product range now includes power solutions from RV, portable, and automatic home standby generators to backup systems for commercial and industrial applications. Generac also maintains an extensive nationwide service network of certified dealers. This dedication to providing reliable backup power for any application has made us the generator experts.

GENERAC'S PORTABLE GENERATORS offer options from home use to camping, job site, construction or outdoor events. Power the fun stuff or cover an emergency. The wide range of sizes gives you the flexibility to choose as much power as you need.

- **Generac's OHVI® Engine** provides the longest run time in the industry and outstanding fuel economy
 - **Electric Start Models** include starting battery
 - **Never-Flat Wheels and Fold-Down Handles** provide easy portability
 - **Hour Meter** with maintenance resets tracks usage
 - **Fuel Gauge** incorporated for added convenience
 - **Low-Tone Muffler** provides quiet operation
 - **CSA and CARB Emissions** models available
- Features and specifications may change by model.

GENERAC'S OHVI® ENGINE

The Engine Designed Specifically for Generator Use

Why is this important? Portable generators are often required to run for hours at a time, day after day. Generac's OHVI engine utilizes the same type of pressurized oil lubrication used to give automobile engines long and trouble free lives and has a significantly longer life than competitive engines - an unprecedented three to four times longer. You can be assured of reliability for applications requiring long run times like job sites, day-long events, and emergency backup.

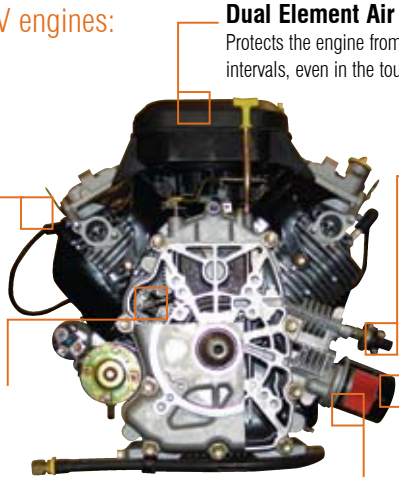

Generac's OHVI engine has advanced features not found in most OHV engines:

Low Effort / One Pull Starts

The oversized recoil and high-efficiency decompression system reduces the effort required to pull the recoil (located on the other side of the engine).

X-Torq™ Governor

The fastest responding governor available. Maximizes engine performance and virtually eliminates stalling.

Dual Element Air Filter

Protects the engine from dirt and extends service intervals, even in the toughest working environments.

Low Oil Pressure Protection

Protects the engine from damage due to improper lubrication. It senses oil pressure and will shut down the engine if the oil level becomes dangerously low, or if the oil overheats and loses viscosity. This system is far superior to other systems that only sense oil level.

Automotive Grade Spin-on Oil Filter

Full pressure lubrication allows the OHVI engine to use an automotive grade oil filter. This filter removes dirt & carbon solids that cause premature engine wear, ensuring long engine life.

Pressurized Lubrication System

OHVI engines are positively lubricated from start-up to shutdown by a lubrication system that pumps oil directly to every critical engine bearing and at greater angles of operation.

XP SERIES: 4000-8000 WATTS

The professional grade XP Series of portable generators has been engineered for high performance using the Generac OHVI engine. Durable construction with oversized full-wrap frame tubing and impact resistant corners minimizes damage from rough handling. These rugged units also include:

- **True Power™ Technology** for utility quality electrical output for sensitive electronics
- **Low-Oil Pressure Protection** to protect engine from damage
- **Covered Outlets** for more protection from the environment
- **Start/Stop Fuel Shut-off and Choke Controls** conveniently located on outlet panel
- **Circuit Breaker Outlet Protection** including dual breakers on 120/240V outlets
- **External Battery Charge Jack**
- **Maintenance Kit** included
- **Cord Set** included with:
 - XP4000 - 20' 20 Amp w/ 4 outlets
 - XP6500E & XP8000E - 20' 30 Amp w/ 4 outlets

GP SERIES: 1800-17500 WATTS

GP 1800 — 10000 Watts

Easy to use in a variety of applications, our GP series of portable generators offers affordable reliability. Many models feature the Generac OHVI engine. Features include:

- **Hardened Steel Tube Cradle** for durability
- **Low-Oil Shutdown** prevents possible engine damage
- **Circuit Breaker Protected Outlets** for circuit protection

GP 15000 — 17500 Watts

Two of the most powerful generators on the market provide exceptional value. Additional features include:

- **16-Gallon Fuel Tank** for extended run times
- **Idle Control** increases fuel efficiency
- **Wheel Kit and Lifting Eye** Included
